Hello,

I'm craving for

Noodles

a perfect role

I'm One Of Many UIUX Designers Out There, But The One You Won't Regret Hiring.

I'm a Product Designer with 2+ years of hands-on experience creating visually appealing and user-friendly digital experiences across healthcare, CRM, and consumer applications. Currently, I'm working on product redesigns where I handle the UI design end-to-end, ensuring consistency, usability, and clarity.

I focus on designing solutions that solve real user problems and improve overall user experience. My approach is grounded in user research, structured UX thinking, and data-informed design decisions, especially when working on complex workflows. I'm a fast learner who enjoys taking on new challenges and continuously improving my skills. I actively seek feedback and use it to refine my designs and deliver better outcomes.

If you'd like to learn more about my work or explore potential opportunities, I'd be happy to connect and have a conversation.
